

CLEARCLAIM • RECOVERY SPECIALISTS

THE

FORGOTTEN *Crorepati* REPORT

What 47 Indian share certificates from 1985 to 1995 are actually worth in 2026. With real recovery math.

HDFC • INFOSYS • RELIANCE • WIPRO • ITC
TCS • L&T • TATA STEEL • ASIAN PAINTS
+ 38 OTHER INDIAN COMPANIES

● ABOUT THIS REPORT

A locker full of paper. *A fortune nobody claimed.*

Somewhere in your family there may be an old envelope of share certificates from the 1980s and 1990s. Faded ink, a company name, a folio number. Most families assume the paper is worthless or that the company is long gone. Very often the opposite is true.

Across India, an enormous pool of shares and dividends sits unclaimed. Decades of bonus issues, stock splits, mergers and demergers quietly multiplied small holdings into amounts that can change a family's life. The owners moved house, changed banks, or passed away, and the paper was forgotten.

This report shows you how to find out what an old certificate is really worth today, how the recovery process works, and the exact documents you need for every situation. It is written for ordinary families, not finance professionals.

IMPORTANT. PLEASE READ.

This report is educational. The valuation method is real, but every figure depends on your specific certificate and on the market price on the day you check. Numbers marked **VERIFY** must be confirmed against official BSE and NSE corporate action records and current prices before you rely on them. This report is not investment advice and is not a guarantee of any recovery. For decisions about buying or selling, speak to a SEBI registered adviser.

ClearClaim helps Indian families recover forgotten and unclaimed shares and dividends. We are not affiliated with any government body. The recovery routes described here, including the IEPF, are official processes you can pursue yourself.

10 Red flags and how to stay safe
Spotting recovery scams

11 Company files
Nine well known names, plus a worksheet for the rest

12 Questions, glossary and next steps

● 01 • THE HIDDEN PROBLEM

How a fortune ends up *forgotten*

Three things turn valuable shares into forgotten paper. Understanding them tells you exactly where to look.

1. Life moved on, the shares did not

Families relocate, change banks, and lose track of old folio numbers. Dividend cheques get returned. Annual reports pile up unopened. The holding keeps growing in the background through bonuses and splits while nobody is watching.

2. The seven year rule sends them to the government

Under the Companies Act 2013, if dividends on a share stay unclaimed for seven straight years, the company must transfer both the unclaimed dividends and the underlying shares to the Investor Education and Protection Fund, the IEPF. The shares are not lost. They are held by a government authority and can be claimed back with the right process.

3. Since 2019, paper alone cannot be sold

From 1 April 2019, listed shares can only be transferred in dematerialised form. A physical certificate can no longer be sold or transferred using the old transfer deed. You must first convert it into a demat account. Only transmission, the transfer to a legal heir, and transposition, reordering joint names, are still accepted in physical form.

WHAT THIS MEANS FOR YOU

An old certificate is almost never worthless. It is either still registered in physical form and waiting to be dematerialised, or it has been moved to the IEPF and is waiting to be claimed. Both routes are recoverable. This report covers each one.

● 02 • A RARE WINDOW

There is a window *open right now*

In January 2026, SEBI announced a special one year window to help investors regularise old physical shares that were bought or sold before 1 April 2019. This is unusual, and it does not stay open.

DETAIL	WHAT SEBI ANNOUNCED
Window	5 February 2026 to 4 February 2027
Who it helps	Holders of physical securities bought or sold before 1 April 2019, including transfers that were earlier rejected, returned or left incomplete
What you can do	Re-lodge the transfer and dematerialise the shares through this route
Condition	Securities are credited only in demat form, with a mandatory one year lock-in from the date the transfer is registered

If a transfer of old shares into your name was ever stuck because of missing paperwork or procedural problems, this is the time to fix it. After the window closes, re-lodging becomes far harder.

ACT BEFORE 4 FEBRUARY 2027

If your family holds pre 2019 certificates that were never transferred into the current holder's name, start now. Gather the certificates, the folio details, and proof of who bought them. ClearClaim can confirm whether your case fits this window and prepare the re-lodging.

Window dates and conditions are as announced by SEBI in early 2026. Confirm the current status on the SEBI and RTA notices before filing, as procedural details can be updated.

● 03 • THE RECOVERY MATH

From old paper *to a real number*

The value of an old certificate is not what is printed on it. It is the result of five steps. This is the recovery math.

- 1 Read the certificate.** Note the company name, the number of shares, the face value, the folio number and the date.
- 2 List every corporate action since then.** Bonus issues, stock splits, mergers and demergers all change how many shares you hold today. Put them in date order.
- 3 Apply them in order.** Each action multiplies or converts the running count. A bonus and a split increase the number. A merger converts it at a swap ratio. A demerger adds shares in a new company.
- 4 Multiply by today's price.** Take the adjusted share count and multiply by the current market price of each resulting company.
- 5 Check the IEPF.** If the holding or its dividends were moved to the IEPF, the value is the same, but the recovery route is the IEPF claim rather than a simple demat.

The four corporate actions, in plain words

ACTION	WHAT IT DOES TO YOUR COUNT
Bonus issue	Free extra shares in a ratio. A 1 to 1 bonus doubles your shares.
Stock split	Face value is cut, count goes up. A split from ₹10 to ₹1 multiplies your shares ten times.
Merger	Your shares convert into the acquiring company at a fixed swap ratio.
Demerger	You keep the original shares and receive shares in a spun off company.

● 03 • THE RECOVERY MATH

A worked example

Here is the method on a single hypothetical holding. The company and the figures are illustrative. They show how the steps fit together, not the value of any real certificate.

ILLUSTRATIVE ONLY

Suppose a relative bought **100 shares** of a company in the early 1990s at a face value of ₹10. Over the years the company declared a 1 to 1 bonus, then later a second 1 to 1 bonus, then split the face value from ₹10 to ₹2.

STEP	ACTION	RUNNING SHARE COUNT
Start	Original holding	100
1	First 1 to 1 bonus	200
2	Second 1 to 1 bonus	400
3	Split, face value ₹10 to ₹2	2,000

The original 100 shares are now **2,000 shares**. If the current market price were, say, a few hundred rupees per share, the holding would be worth several lakh rupees. The exact figure depends entirely on the real company, its real corporate actions, and the price on the day you check. **VERIFY current price**

THE POINT

A holding that looked like a small, old purchase becomes a meaningful sum after the corporate actions are applied. This is why the certificate in the locker is worth checking, not throwing away.

This example uses round numbers for clarity. Real bonus and split chains vary by company and must be confirmed against official corporate action records.

● 04 • DECISION TREE

Four questions *before you start*

Not every certificate is worth the same effort. These four questions tell you where to focus first.

Question 1. Is the company still traceable

Most names from the 1980s and 1990s still exist, often under a new name after a merger. If the company merged or was renamed, your shares converted into the successor. Pursue it. If the company was genuinely wound up with no successor, the value may be limited.

Question 2. How large was the original holding

Even a small original holding can be large today after bonuses and splits. A holding in a company with a heavy bonus history deserves priority over the same size holding in one with none.

Question 3. Is it in physical form or already in the IEPF

If it is still registered in physical form, the route is dematerialisation. If the dividends went unclaimed for seven years, it is likely in the IEPF, and the route is an IEPF-5 claim. Both are recoverable. The paperwork differs.

Question 4. Is the original holder alive

If the holder has passed away, you will use the transmission route as a legal heir, which needs additional documents. Identify the rightful claimant early, because this shapes every form you file.

QUICK RULE

Pursue first, the big multipliers you can still trace.

A traceable company, a heavy bonus history, and a clear claimant is the strongest case. Start there.

● 05 • DOCUMENTS BY SITUATION

The exact paperwork, *case by case*

The documents you need depend on your situation. Here are the five most common cases.

Case A. Holder is alive and holds physical shares

- ✓ Original share certificates
- ✓ PAN and Aadhaar of the holder
- ✓ Cancelled cheque of a bank account linked to Aadhaar
- ✓ A demat account to receive the shares, opened with any depository participant

Case B. Holder has passed away, shares in physical form

- ✓ Original certificates and a notarised death certificate
- ✓ Transmission request form to the company or its registrar
- ✓ Succession proof, a will and probate, a succession certificate, or a legal heirship certificate, depending on the value and the case
- ✓ No objection from other legal heirs where required
- ✓ PAN, Aadhaar and a cancelled cheque of the claimant

Case C. Shares or dividends are in the IEPF

- ✓ An entitlement letter from the company or registrar confirming what was transferred
- ✓ Form IEPF-5 filed online, with the printed acknowledgement and SRN
- ✓ Original indemnity bond and advance stamped receipt
- ✓ Original certificates, identity proof, and a cancelled cheque of an Aadhaar linked account
- ✓ A 16 digit demat account, both DP ID and Client ID, to receive the shares

Case D. Joint holders, names in the wrong order

- ✓ Transposition request to reorder the names, accepted in physical form
- ✓ Signatures of all joint holders

Case E. Certificate lost or damaged

- ✓ Apply to the registrar for a duplicate, with an FIR or police complaint and an indemnity, as required

Document lists vary by company, by claim value, and by case. Confirm the exact requirement with the company or its registrar before you submit. **VERIFY current requirements per company**

● 06 • THE IEPF PROCESS

Claiming back from *the IEPF*

If a holding or its dividends were transferred to the IEPF, you claim them back with Form IEPF-5. Here is the process, in order.

- 1 **Get your entitlement letter.** Contact the company or its registrar and ask for written confirmation of the shares and the year wise dividends transferred to the IEPF.
- 2 **File Form IEPF-5 online.** Submit the form on the official IEPF portal. A revised IEPF-5 has been in effect since October 2025. The form now allows shares only claims and asks for your 16 digit demat details.
- 3 **Note your SRN.** Online submission generates a unique service request number. Keep the acknowledgement.
- 4 **Send the physical set to the nodal officer.** Post the self attested form and SRN acknowledgement, the original indemnity bond, the original advance stamped receipt, the original certificates, identity proof, and a cancelled cheque to the company's IEPF nodal officer at its registered office, in an envelope marked Claim for refund from IEPF Authority.
- 5 **Company verifies.** The company checks the documents and files its e-verification report to the IEPF Authority.
- 6 **Authority approves and credits.** Once approved, shares are credited to your demat account and any refund goes to your Aadhaar linked bank account.

SET YOUR EXPECTATIONS ON TIME

The IEPF claim is thorough and can take many months from filing to credit. Claimants aged 75 and above are given priority. Keep your demat account active and your KYC current so the credit is not delayed.

Process details follow the IEPF rules as amended in 2025. The official portal is the authority for the current form and steps.

VERIFY current portal steps

● 07 • DEMATERIALISING

Turning paper *into a demat holding*

If your shares are still registered in physical form and are not in the IEPF, the route is dematerialisation. This is how a paper certificate becomes a line in a demat account that you can hold or sell.

- 1 **Open a demat account** with any depository participant, which can be a bank or a broker, if you do not already have one.
- 2 **Fill the dematerialisation request form**, the DRF, available with your depository participant.
- 3 **Attach the original certificates** and submit them to the depository participant.
- 4 **The depository participant forwards them** to the company's registrar for verification.
- 5 **Shares are credited** to your demat account, typically in around three weeks, after which they can be held or sold.

FIRST, FIX THE NAME

Before you dematerialise, the shares must be in the current holder's name. If they are still in the name of a deceased relative, complete transmission first. If a pre 2019 transfer was never registered, use the SEBI special window described earlier.

Timelines vary by company and registrar. Confirm with your depository participant.

● 08 • TRANSMISSION

When the holder *has passed away*

Transmission is the transfer of shares to a legal heir or nominee after the holder's death. Unlike a normal transfer, it is still accepted in physical form. It is one of the most common situations with old family certificates.

If there is a nominee registered

The process is simpler. The nominee submits a transmission request, a notarised death certificate, and identity proof. The shares move to the nominee, who can then dematerialise them.

If there is no nominee

The legal heir submits a transmission request with a notarised death certificate and proof of succession. Depending on the value and the case, this can mean a will with probate, a succession certificate, or a legal heirship certificate, along with a no objection from other heirs.

PRACTICAL ORDER

Complete transmission so the shares are in the heir's name. Then dematerialise. Then, if dividends from earlier years went to the IEPF, file the IEPF-5 claim. Doing these in the wrong order causes most delays.

Succession requirements differ by value, by state and by family circumstances. Confirm the exact documents with the registrar. **VERIFY requirements per case**

● 09 • REGISTRARS

Who holds *the records*

Most companies do not handle shareholder records themselves. They appoint a registrar and transfer agent, an RTA, which keeps the folios, processes claims, and verifies documents. Knowing the right RTA saves weeks.

REGISTRAR	NOTES
KFin Technologies	One of the two largest RTAs in India, formerly Karvy. Handles a very large number of listed companies. VERIFY
MUFG Intime India	Formerly Link Intime, the other major RTA. VERIFY
TSR Consultants	Registrar for several Tata group and other companies. VERIFY
Cameo, Bigshare, Integrated and others	Regional and mid sized registrars used by many companies. VERIFY

HOW TO FIND THE RIGHT ONE

The registrar for any listed company is named in its annual report and on its investor relations page, and on the BSE and NSE company pages. Always confirm the current registrar, because companies change RTAs over the years.

Registrar names and assignments change. Confirm the current registrar for each company before you write.

VERIFY current RTA per company

Recovery scams, *and how to spot them*

Where there is unclaimed money, there are people who prey on it. A genuine recovery firm is transparent. Watch for these warning signs.

- ✓ **A large upfront fee before any work.** Be cautious of anyone who demands a big payment before establishing that you even have a recoverable holding.
- ✓ **A request for your original certificates by courier to an unknown address.** Originals are sensitive. Understand exactly who holds them and why.
- ✓ **A promise of a guaranteed amount or a guaranteed timeline.** No honest firm can guarantee an IEPF outcome or its timing. The authority decides.
- ✓ **Pressure to share OTPs, demat passwords or full bank access.** Never share these. They are never required to assess a claim.
- ✓ **No written scope, no clear fee, no verifiable office.** Insist on all three.

A SIMPLE TEST

A trustworthy firm will first tell you what you have, in writing, and only then discuss a fair, agreed fee for the work. Anyone who reverses that order deserves caution.

● 11 • COMPANY FILES

How to read *these pages*

The next pages cover nine well known names that often appear in old family holdings. Each page is built the same way.

- ✓ **What happened to the shares.** The corporate actions on the public record that matter for your count. Verified events are stated plainly. Anything that needs checking is marked.
- ✓ **How to trace your count.** The order in which to apply those actions to your specific certificate.
- ✓ **Illustrative mechanics.** A hypothetical example that shows how the multipliers work. These are mechanics, not valuations of any real holding.
- ✓ **The five step table.** The same recovery math from earlier, applied to that company.
- ✓ **Registrar to approach.** Where the records sit, to confirm before you write.

ON THE NUMBERS

Current prices and the exact bonus and split chains change and must be confirmed against official BSE and NSE corporate action records. Figures marked **VERIFY** are placeholders for that confirmed data. ClearClaim does this verification for your exact certificate.

● COMPANY FILE 01 OF 47

HDFC

HDFC Ltd, now HDFC Bank. **Merged into HDFC Bank, effective 1 July 2023**

What happened to the shares

- ✓ HDFC Ltd merged into HDFC Bank with effect from 1 July 2023. The record date was 13 July 2023.
- ✓ Shareholders received 42 HDFC Bank shares for every 25 HDFC Ltd shares held, a ratio of 1.68 to 1. Fractional entitlements were settled in cash.
- ✓ HDFC Ltd no longer trades as a separate share. Any old HDFC Ltd certificate now maps to HDFC Bank shares.

HOW TO TRACE YOUR COUNT

Trace any earlier HDFC Ltd bonus issues or splits that applied before the 2023 merger, then apply the 42 to 25 conversion. [VERIFY earlier bonus and split chain](#)

Illustrative mechanics

The figures below show how corporate actions multiply a holding. They are mechanics, not a valuation of any real certificate.

A hypothetical 100 HDFC Ltd shares convert to 168 HDFC Bank shares (100 times 1.68). Earlier bonuses would increase the starting count before this step.

STEP	WHAT TO CONFIRM
1. Original holding	Number of shares and face value printed on the certificate
2. Corporate actions	Every bonus, split, merger and demerger since that date VERIFY
3. Shares today	Adjusted count after applying step 2 in order
4. Today's value	Adjusted count multiplied by the current market price VERIFY current price
5. Unclaimed status	Whether the holding or its dividends sit in the IEPF

REGISTRAR TO APPROACH

MUFG Intime India, formerly Link Intime [VERIFY current RTA](#). ClearClaim confirms the registrar and the full corporate action chain for your exact certificate before any claim is filed.

● COMPANY FILE 02 OF 47

INFOSYS

Infosys Ltd. **Listed since 1993. Still trades under the same name.**

What happened to the shares

- ✓ Infosys completed its IPO in 1993 at an offer price of about ₹95 per share.
- ✓ Over the decades it has issued multiple bonus shares and carried out a stock split, which multiplied original holdings many times over.
- ✓ This is the classic case where a small mid-1990s holding, left untouched, has compounded into a large position.

HOW TO TRACE YOUR COUNT

Map every bonus issue and split between your certificate date and today, in order, then multiply. **VERIFY exact bonus and split chain for the certificate year**

Illustrative mechanics

The figures below show how corporate actions multiply a holding. They are mechanics, not a valuation of any real certificate.

Mechanics only. A single 1 to 1 bonus doubles your shares. A second 1 to 1 bonus doubles them again. Repeated bonuses are why early Infosys holdings grew so sharply.

STEP	WHAT TO CONFIRM
1. Original holding	Number of shares and face value printed on the certificate
2. Corporate actions	Every bonus, split, merger and demerger since that date VERIFY
3. Shares today	Adjusted count after applying step 2 in order
4. Today's value	Adjusted count multiplied by the current market price VERIFY current price
5. Unclaimed status	Whether the holding or its dividends sit in the IEPF

REGISTRAR TO APPROACH

KFin Technologies **VERIFY current RTA**. ClearClaim confirms the registrar and the full corporate action chain for your exact certificate before any claim is filed.

● COMPANY FILE 03 OF 47

RELIANCE

Reliance Industries Ltd. **Listed for decades. Still trades under the same name.**

What happened to the shares

- ✓ Reliance Industries demerged Jio Financial Services in 2023 at a 1 to 1 ratio, one JFS share for every RIL share. A special price discovery session was held on 20 July 2023.
- ✓ An earlier 2005 restructuring created separate Anil Ambani group companies.
- ✓ Multiple bonus issues over the years have added to original holdings.

HOW TO TRACE YOUR COUNT

Apply each bonus in sequence, then add the entities you received in the 2005 restructuring and the 2023 JFS demerger. **VERIFY full chain for the certificate year**

Illustrative mechanics

The figures below show how corporate actions multiply a holding. They are mechanics, not a valuation of any real certificate.

After the 2023 demerger, a hypothetical 100 RIL shares became 100 RIL shares plus 100 Jio Financial Services shares.

STEP	WHAT TO CONFIRM
1. Original holding	Number of shares and face value printed on the certificate
2. Corporate actions	Every bonus, split, merger and demerger since that date VERIFY
3. Shares today	Adjusted count after applying step 2 in order
4. Today's value	Adjusted count multiplied by the current market price VERIFY current price
5. Unclaimed status	Whether the holding or its dividends sit in the IEPF

REGISTRAR TO APPROACH

KFin Technologies **VERIFY current RTA**. ClearClaim confirms the registrar and the full corporate action chain for your exact certificate before any claim is filed.

● COMPANY FILE 04 OF 47

WIPRO

Wipro Ltd. **Listed for decades. Still trades under the same name.**

What happened to the shares

- ✓ Wipro has one of the most aggressive bonus and split histories on the Indian market.
- ✓ Repeated bonus issues over the years mean a small early holding has compounded enormously.
- ✓ Old physical Wipro certificates are among the most valuable that families commonly forget.

HOW TO TRACE YOUR COUNT

Lay out every bonus and split in date order and multiply through. The chain is long, so work carefully. **VERIFY exact bonus and split chain**

Illustrative mechanics

The figures below show how corporate actions multiply a holding. They are mechanics, not a valuation of any real certificate.

Mechanics only. Three successive 1 to 1 bonuses turn 100 shares into 800. The real chain is longer, which is why the multiplier is so large.

STEP	WHAT TO CONFIRM
1. Original holding	Number of shares and face value printed on the certificate
2. Corporate actions	Every bonus, split, merger and demerger since that date VERIFY
3. Shares today	Adjusted count after applying step 2 in order
4. Today's value	Adjusted count multiplied by the current market price VERIFY current price
5. Unclaimed status	Whether the holding or its dividends sit in the IEPF

REGISTRAR TO APPROACH

KFin Technologies **VERIFY current RTA**. ClearClaim confirms the registrar and the full corporate action chain for your exact certificate before any claim is filed.

● COMPANY FILE 05 OF 47

ITC

ITC Ltd. **Listed for decades. Still trades under the same name.**

What happened to the shares

- ✓ ITC has a long record of bonus issues and a stock split that reduced face value over the years.
- ✓ It is known for consistently high dividends.
- ✓ High, regular dividends are exactly the payouts that go unclaimed and get routed to the IEPF after seven years.

HOW TO TRACE YOUR COUNT

Apply the bonus and split chain to the share count, and separately list every unclaimed dividend year for an IEPF claim. [VERIFY chain and dividend history](#)

Illustrative mechanics

The figures below show how corporate actions multiply a holding. They are mechanics, not a valuation of any real certificate.

A face value split from ₹10 to ₹1 multiplies your share count ten times for the same holding. [VERIFY ITC split ratio and date](#)

STEP	WHAT TO CONFIRM
1. Original holding	Number of shares and face value printed on the certificate
2. Corporate actions	Every bonus, split, merger and demerger since that date VERIFY
3. Shares today	Adjusted count after applying step 2 in order
4. Today's value	Adjusted count multiplied by the current market price VERIFY current price
5. Unclaimed status	Whether the holding or its dividends sit in the IEPF

REGISTRAR TO APPROACH

[VERIFY current RTA](#). ClearClaim confirms the registrar and the full corporate action chain for your exact certificate before any claim is filed.

● COMPANY FILE 06 OF 47

TCS

Tata Consultancy Services Ltd. **Listed since 2004. Still trades under the same name.**

What happened to the shares

- ✓ TCS completed its IPO in 2004, so certificates date from 2004 onward rather than the 1980s or early 1990s.
- ✓ Since listing it has issued bonus shares and carried out several large buybacks.
- ✓ TCS publishes a clear IEPF help kit, and its registrar handles claims through the standard process.

HOW TO TRACE YOUR COUNT

Apply any post 2004 bonus to the share count and check whether you participated in past buybacks. [VERIFY bonus history](#)

Illustrative mechanics

The figures below show how corporate actions multiply a holding. They are mechanics, not a valuation of any real certificate.

Mechanics only. A 1 to 1 bonus on 100 shares gives you 200 shares at no extra cost.

STEP	WHAT TO CONFIRM
1. Original holding	Number of shares and face value printed on the certificate
2. Corporate actions	Every bonus, split, merger and demerger since that date VERIFY
3. Shares today	Adjusted count after applying step 2 in order
4. Today's value	Adjusted count multiplied by the current market price VERIFY current price
5. Unclaimed status	Whether the holding or its dividends sit in the IEPF

This is a working list of well known, long listed Indian companies, not a claim about your specific holdings or their value. Confirm each one against official records. **VERIFY per company**

● 12 • QUESTIONS

Common questions

Are old physical shares really still valid

Yes. The shares remain valid. Since 2019 they cannot be sold in paper form, but they can be dematerialised and then held or sold. If they went to the IEPF, they can be claimed back.

How do I know if my shares are in the IEPF

Ask the company or its registrar for an entitlement letter, which states what was transferred and when. The IEPF portal also lets you search transferred holdings.

The original holder has died. Can we still claim

Yes, through transmission as a legal heir. You will need a notarised death certificate and succession proof appropriate to the value and the case.

How long does an IEPF claim take

It is thorough and can take many months from filing to the shares being credited. Senior citizens aged 75 and above are given priority.

Do I need a demat account

Yes. Recovered shares are credited in demat form, so an active demat account with current KYC is required.

Can ClearClaim do this for me

Yes. We trace the holding, confirm the corporate action chain and current value, identify the correct route, and prepare the paperwork end to end.

Plain words

TERM	WHAT IT MEANS
Bonus issue	Free additional shares given to existing holders in a set ratio
Stock split	A reduction in face value that increases the number of shares for the same holding
Merger	Two companies combine. Your shares convert into the surviving company at a swap ratio
Demerger	A company spins off a part of itself. You receive shares in the new company in addition to your existing shares
Dematerialisation	Converting a physical certificate into an electronic holding in a demat account
Transmission	Transfer of shares to a legal heir or nominee after the holder's death
Transposition	Reordering the names of joint holders
IEPF	Investor Education and Protection Fund, the government fund that holds shares and dividends unclaimed for seven years
Form IEPF-5	The online form used to claim shares and dividends back from the IEPF
SRN	Service request number, the tracking reference generated when you file online
RTA	Registrar and transfer agent, the firm that keeps shareholder records for a company
DP	Depository participant, the bank or broker through which you hold a demat account
Folio number	The account number under which your physical shares are registered with the company
